

PIMCO FUNDS

Record	12/9/2009
Ex-Dividend	12/10/2009
Cap Gain Reinvest	12/10/2009
Payable	12/10/2009

Performance quoted represents past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and principal value will fluctuate so that Fund shares may be worth more or less than their original cost when redeemed. Performance does not reflect the deduction of additional charges and expenses imposed in connection with investing in Variable Contracts, which will reduce returns. Performance data current to the most recent month-end is available at www.pimco-funds.com/pvit or by calling (800) 927-4648.

Investors should consider the investment objectives, risks, charges, and expenses of this Portfolio and the variable product carefully before investing. This and other important information are contained in the PIMCO Variable Insurance Trust (the "Portfolio") prospectus and the variable product prospectus. Ask your financial professional to explain all charges that may apply. The portfolio prospectus may be obtained by contacting your PIMCO representative. The variable product prospectus may be obtained by contacting the applicable insurance company or your Investment Consultant. Please read both the PIMCO Variable Insurance Trust prospectus and the variable product prospectus carefully before you invest or send money.

* Money Market funds are not insured or guaranteed by FDIC or any other government agency and although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund.

Disclosures:

¹ The net asset value (NAV) drops in direct relationship to the capital gains paid, plus or minus market movement. For example, if a Fund has a 10.00 NAV and pays a 25 cent dividend, the stated NAV will be 9.75 if there is no market movement. The day's market movement will be added or subtracted to the 9.75 NAV. The Shareholder will either receive more shares of the fund (reinvestment) or take the distribution in cash.

² Portfolio net asset values from the previous business day have been listed in order to show the amount of NAV change resulting from the drop in NAV due to the capital gains versus the daily market movement.

All investments carry risk, including but not limited to: Investing in the bond market is subject to certain risks including market, interest-rate, issuer, credit, and inflation risk; investments may be worth more or less than the original cost when redeemed. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. Derivatives and commodity-linked derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Commodity-linked derivative instruments may involve additional costs and risks such as changes in commodity index volatility or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. Investing in derivatives could lose more than the amount invested. Please refer to the Fund's prospectus for a complete list of applicable risks.

The value of most bond funds and fixed income securities are impacted by changes in interest rates. Bonds and bond funds with longer durations tend to be more sensitive and more volatile than securities with shorter durations; bond prices generally fall as interest rates rise.
