

**PIMCO VARIABLE INSURANCE TRUST
30 DAY SEC YIELDS
As Of 04/30/2010**

Investors should consider the investment objectives, risks, charges, and expenses of this Portfolio and the variable product carefully before investing. This and other important information are contained in the PIMCO Variable Insurance Trust (the "Portfolio") prospectus and the variable product prospectus. Ask your financial professional to explain all charges that may apply. The portfolio prospectus may be obtained by contacting your PIMCO representative. The variable product prospectus may be obtained by contacting the applicable insurance company or your Investment Consultant. Please read both the PIMCO Variable Insurance Trust prospectus and the variable product prospectus carefully before you invest or send money.

Money Market funds are not insured or guaranteed by FDIC or any other government agency and although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund. If there is a material difference between the quoted total return and the quoted current yield, the yield quotation more closely reflects the current earnings of the Money Market fund than the total return quotation. Yields computed by SEC-prescribed calculations and are subject to change.

Performance quoted represent past performance. Past performance is not a guarantee or a reliable indicator of future results. Current performance may be lower or higher than performance shown. Investment return and principal value will fluctuate so that fund shares may be worth more or less than their original cost when redeemed. Performance does not reflect the deduction of additional charges and expenses imposed in connection with investing in Variable Contracts, which will reduce returns. Performance data current to the most recent month-end is available at www.pimco-funds.com/pvit or by calling (800) 927-4648.

The performance figures presented reflect the total return performance and reflect changes in share price and reinvestment of dividend and capital gain distributions. All periods longer than one year are annualized. Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), having different minimum investment requirements and are entitled to different services.

The SEC Yield is a standardized annual yield based on the most recent 30 day period. It is calculated in accordance with current Securities and Exchange Commission Regulations and is subject to change.

All investments carry risk, including but not limited to: Investing in the bond market is subject to certain risks including market, interest-rate, issuer, credit, and inflation risk. Investing in foreign denominated and/or domiciled securities may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. Derivatives and commodity-linked derivatives may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Commodity-linked derivative instruments may involve additional costs and risks such as changes in commodity index volatility or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and international economic, political and regulatory developments. Investing in derivatives could lose more than the amount invested. Please refer to the fund's prospectus for a complete list of applicable risks.

The value of most bond funds and fixed income securities are impacted by changes in interest rates. Bonds and bond funds with longer durations tend to be more sensitive and more volatile than securities with shorter durations; bond prices generally fall as interest rates rise.
